Elementary education is worth **MORE**

now and confirm with your signature our demands for a sustainable improvement of the framework conditions for elementary education!

01 Every child has a right to **education**. This must finally be guaranteed for all children. Parents should be able to freely choose elementary educational institutions and after-school care centres.

02 An improvement in **training**. This means more academic training and minimum standards – especially for assistants.

03 Elementary education must be integrated **into the competence of the Ministry of Education**.

04 **Fair payment**: The same salary scheme must apply to the respective occupational groups throughout Austria.

05 Elementary educational facilities must be offered **free of charge and all day** for all children in Austria.

06 Experts from practice and interest groups must be **consulted** when laws affecting kindergartens and after-school care centres are being formulated.

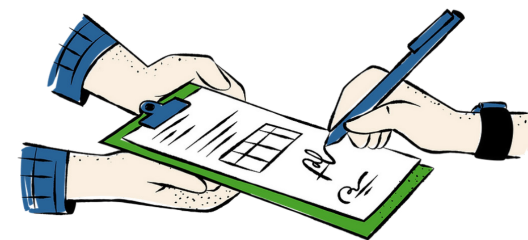

07 **More staff**: The number of children per specialist and the size of a group should not be determined by money, but by scientific standards.

08 An independent institute: This is intended to develop and regularly evaluate quality standards that apply throughout Austria for kindergartens and after-school care centres.

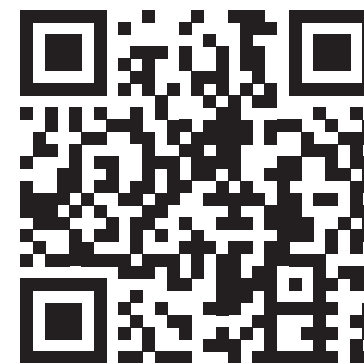

09 **More time for preparation**: - at least 25 percent: The kindergarten and assistant staff need resources to plan group work..

10 **Management and support staff resources**: As in schools, managers in kindergartens and after-school care centres must also be released from work.
